

Year 7 Catch-Up Funding 2016-2017

Funding received for 2016-17 as follows:

Catch Up - approximately £10,500

For the current academic year, the funding received will support the Year 7 cohort who entered the school after achieving a scaled score of 100 and below for Maths and English. We have determined that of the current Y7 cohort, 64 Students have achieved a scaled reading score below 100 in English with 8 of those students working below the level of the test. In Maths, 54 students have achieved a scaled score of below 100 with 5 students working below the level of the test.

The funding will provide a programme to ensure numeracy and literacy progress with these students.

The students have been provided with an extra Maths class all year during the school day. Workshops in literacy and a theatre visit have taken place with books relating to the production.

A summer school is planned for 4 days to offer an enrichment programme of literacy and numeracy to students still not making the required progress.
